Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. 35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms, which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: incomplete parenthetical phrases (specification line 15, "90-150 (C", claim 6 "phenyl)") and improper superscripts or subscripts (specification page 5, line 21 "H₂NR"). The substitute specification filed, must be accompanied by a statement that it contains no new matter.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 1755

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

For example:

In claim 1, the structural formula of the metal phthalocyanines sulphonamides needs to be indicated as either the structure shown or the $\text{MPc}(\text{SO}_2\text{NHR})_x$ so that the claim is clear as to what the structure being claimed is.

In claim 1, the degree symbol was not indicated properly and formulas need to be indicated in proper format with subscripts and superscripts if required so that they are clear.

In claims 6, 18, 19 and 20, "cobalt phthalocyanine tetra-N15 4-hydroxyphenyl) sulphonamide" identity is unclear.

Allowable Subject Matter

Claims 1-21 are objected to as being allowable if 112 rejections are corrected.

The following is a statement of reasons for the indication of allowable subject matter:

Prior art of record fails to teach or suggest the specific metal phthalocyanine compound and method of making.

Relevant Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 6565740 B2 is not prior art but should have been cited by Applicants.

US 5135717 and US 5346670 teach a different group of metals used in a metal phthalocyanine compound.

US 5359056 teaches a different group of metals used in a metal phthalocyanine compound.

US 5248538 teaches three of the metals in the dependent Markush group but does not teach Applicants method of making.
